

MULTIPHER TRAP (I, II AND III) ASSEMBLY INSTRUCTIONS

Use with a pheromone lure to attract target insect and an insecticide strip or sticky liner (sold separately), or soapy water to retain insects.

Components:

- Trap lid (A)
- Shuttlecock (B)
- Funnel (C)
- Trap bucket (D)

How to assemble

- 1** Use the small hole in the funnel to hang an insecticide strip (with a paper clip or safety pin) or place a sticky liner (sticky side inwards) in the bottom of the trap bucket. Alternatively, pour soapy water into bucket. Insert the funnel, pointing downwards, into the bucket so that it rests on the ridge at the top of the bucket.
- 2** Snap the shuttlecock into the smaller of the two fittings beneath the trap lid. Secure the pheromone lure (not included) inside the shuttlecock using a paper clip, safety pin, or other system.
- 3** Insert the trap bucket into the larger ring and twist to lock. Hang trap in desired location using a wire hanger (not included).

Reuse traps only to capture the same insect since pheromone will impregnate traps permanently.

NOTE TO USER:

To prolong storage life, refrigerate or freeze unused pheromone lures in their original foil pouch. To avoid contamination, use tweezers or rubber gloves when handling lures.

**For more information about pheromones, insecticide strips, or other available products, contact us or visit www.solida.ca.*
